DESCRIPTION

GAMMA PASSIVE FASADA EKO polystyrene boards contain a minimum of 10% recycled materials.

The EPS boards comply with the following standard code: EN 13163:2012

EPS-EN 13163-T1-L2-W2-Sb2-P5-BS60.

These boards are produced with a polystyrene foaming method, based on materials with graphite to improve their thermal insulation properties.

Accessible sizes: 1000 x 500 [mm]

Board thickness: from 10 [mm], in increments of 10 [mm]

Edges' trim: smooth or milled overlapping edges (trim size – 15 [mm])

ATTENTION

- The polystyrene boards should not come into direct contact with substances harmful to polystyrene, e.g. organic solvents such as acetone, benzene, turpentine or gasoline.
- The polystyrene boards should be stored protected from damages and exterior conditions.
- Due to higher absorption of UV radiation graphic boards should be protected from direct exposure to the sun during transportation, as well as in storage within construction sites.

BASIC USES

- external thermal insulation performed with a light-wet method [ETICS]
- external thermal insulation performed with a light-dry method
- external insulation in interior partition walls
- external horizontal thermal insulation of:
 - roofs with cladding from the inside
 - floors between joists
 - light framed roofs with cladding
 - spaces between rafters
 - ventilated roofs

DOCUMENTS

- Declaration of performance no. 03-DoP-2018 with the standard code EN 13163:2012.
- Hygienic approval EPS-P no. HK/B/0921/02/2015.

THERMAL RESISTANCE – dependent on product thickness

Thickness [mm]																			
10	20	30	40	50	60	70	80	90	100	110	120	130	140	150	160	170	180	190	200
Thermal resistance RD [m ² K/W]
