Thermoboxes 400X300

light
and handy

exceptionally
durable

great shock
absorption

protect products
from light

protect products
from drying

All boxes are PZH-Certified (Polish National Institute of Hygiene).

DESCRIPTION

Thermobox WEBOX® 400x300 is made of expandable polystyrene (EPS) in molding technology.

These lightweight but practical, high-quality EPS boxes are designed to protect products in transport and storage. Hygienic, with excellent thermal insulation properties, they are especially recommended for foods such as fish, seafood and meats.

WEBOX®

BENEFITS WEBOX®

WEBOX® is designed to provide multiple advantages for users. It is light and handy, but at the same time durable so that absorbs shocks well. It protects products from light, moisture, low and high temperatures and prevents drying out. It will work well during long journeys, even by a few day transport. WEBOX® is suitable for stacking. Thermoboxes can be printed on request.

DRAIN SYSTEMS

DRAIN HOLES

Each of the boxes can be produced in a version without and with drain holes

DRAIN SPACER

Each box can be equipped with the removable spacer, that drain excess water coming from products.

APPLICATION CONSIDERATIONS

- Service temperature: for products with temperatures up to + 70°C and down to -18°C.
- Storage: store in dry and sun-free rooms at the temperature of 5-35°C.
- The containers should not be used in ovens and not used as a toy.

HEALT AND SAFETY, ENVIRONMENT

According to the REACH regulation, WEBOX® packaging does not contain harmful substances. Used packaging is 100% recyclable, therefore it is recommended to recycle it.

STANDARDS AND QUALITY

All Yetico production plants operate on the basis of procedures that enable product standardization. This ensures repeatability of technical parameters. We use only raw materials from reputable companies for production. The products are manufactured in accordance with applicable standards and have the appropriate approvals, enabling free turnover of goods. We operate according to the assumptions of the Integrated Quality Management System, in accordance with the standards: PN-EN ISO 9001, PN-EN ISO 14001, PN-N-45001.
